

# The Auronex Ascent: The Geometry of Elite Wealth

Architectural Blueprint & Reward Mechanics

# The Philosophy of Elegance

Auronex operates on the exclusive Sierpinski reward model. True wealth generation is not a flat line; it is a meticulously constructed geometry.

## Personal Capacity:

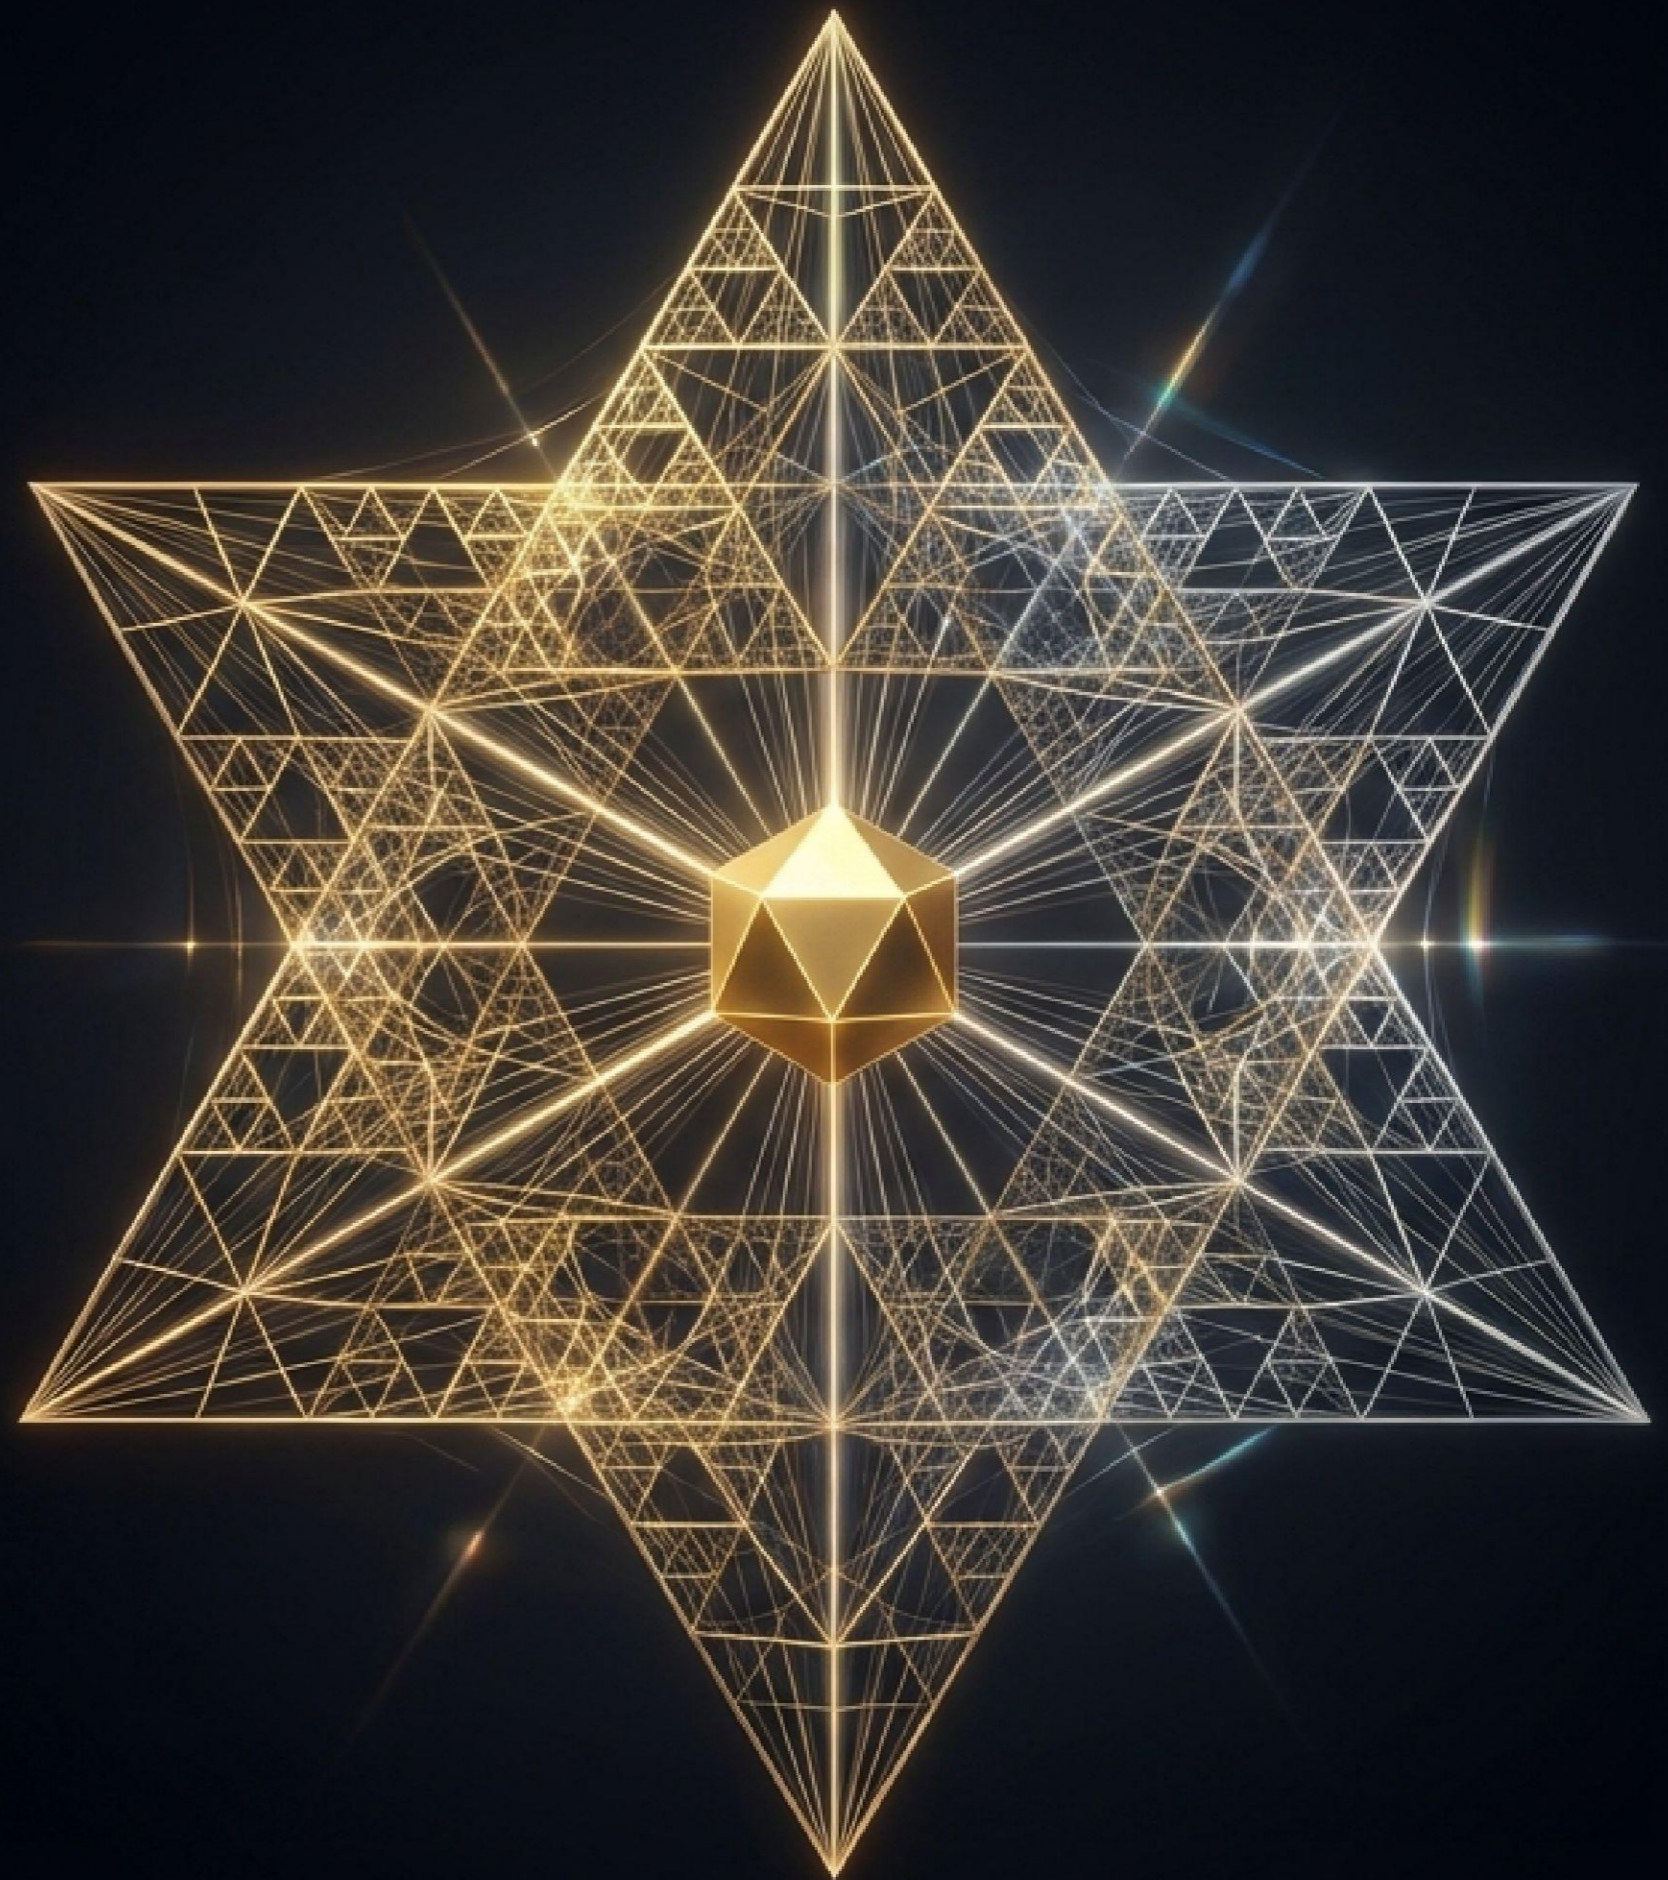

Capitalising on your Inherent staking weight.

## Sponsor Chain:

Cultivating a rich, multi-generational legacy.

## Structural Completion:

Mastering the art of triangular network architecture.

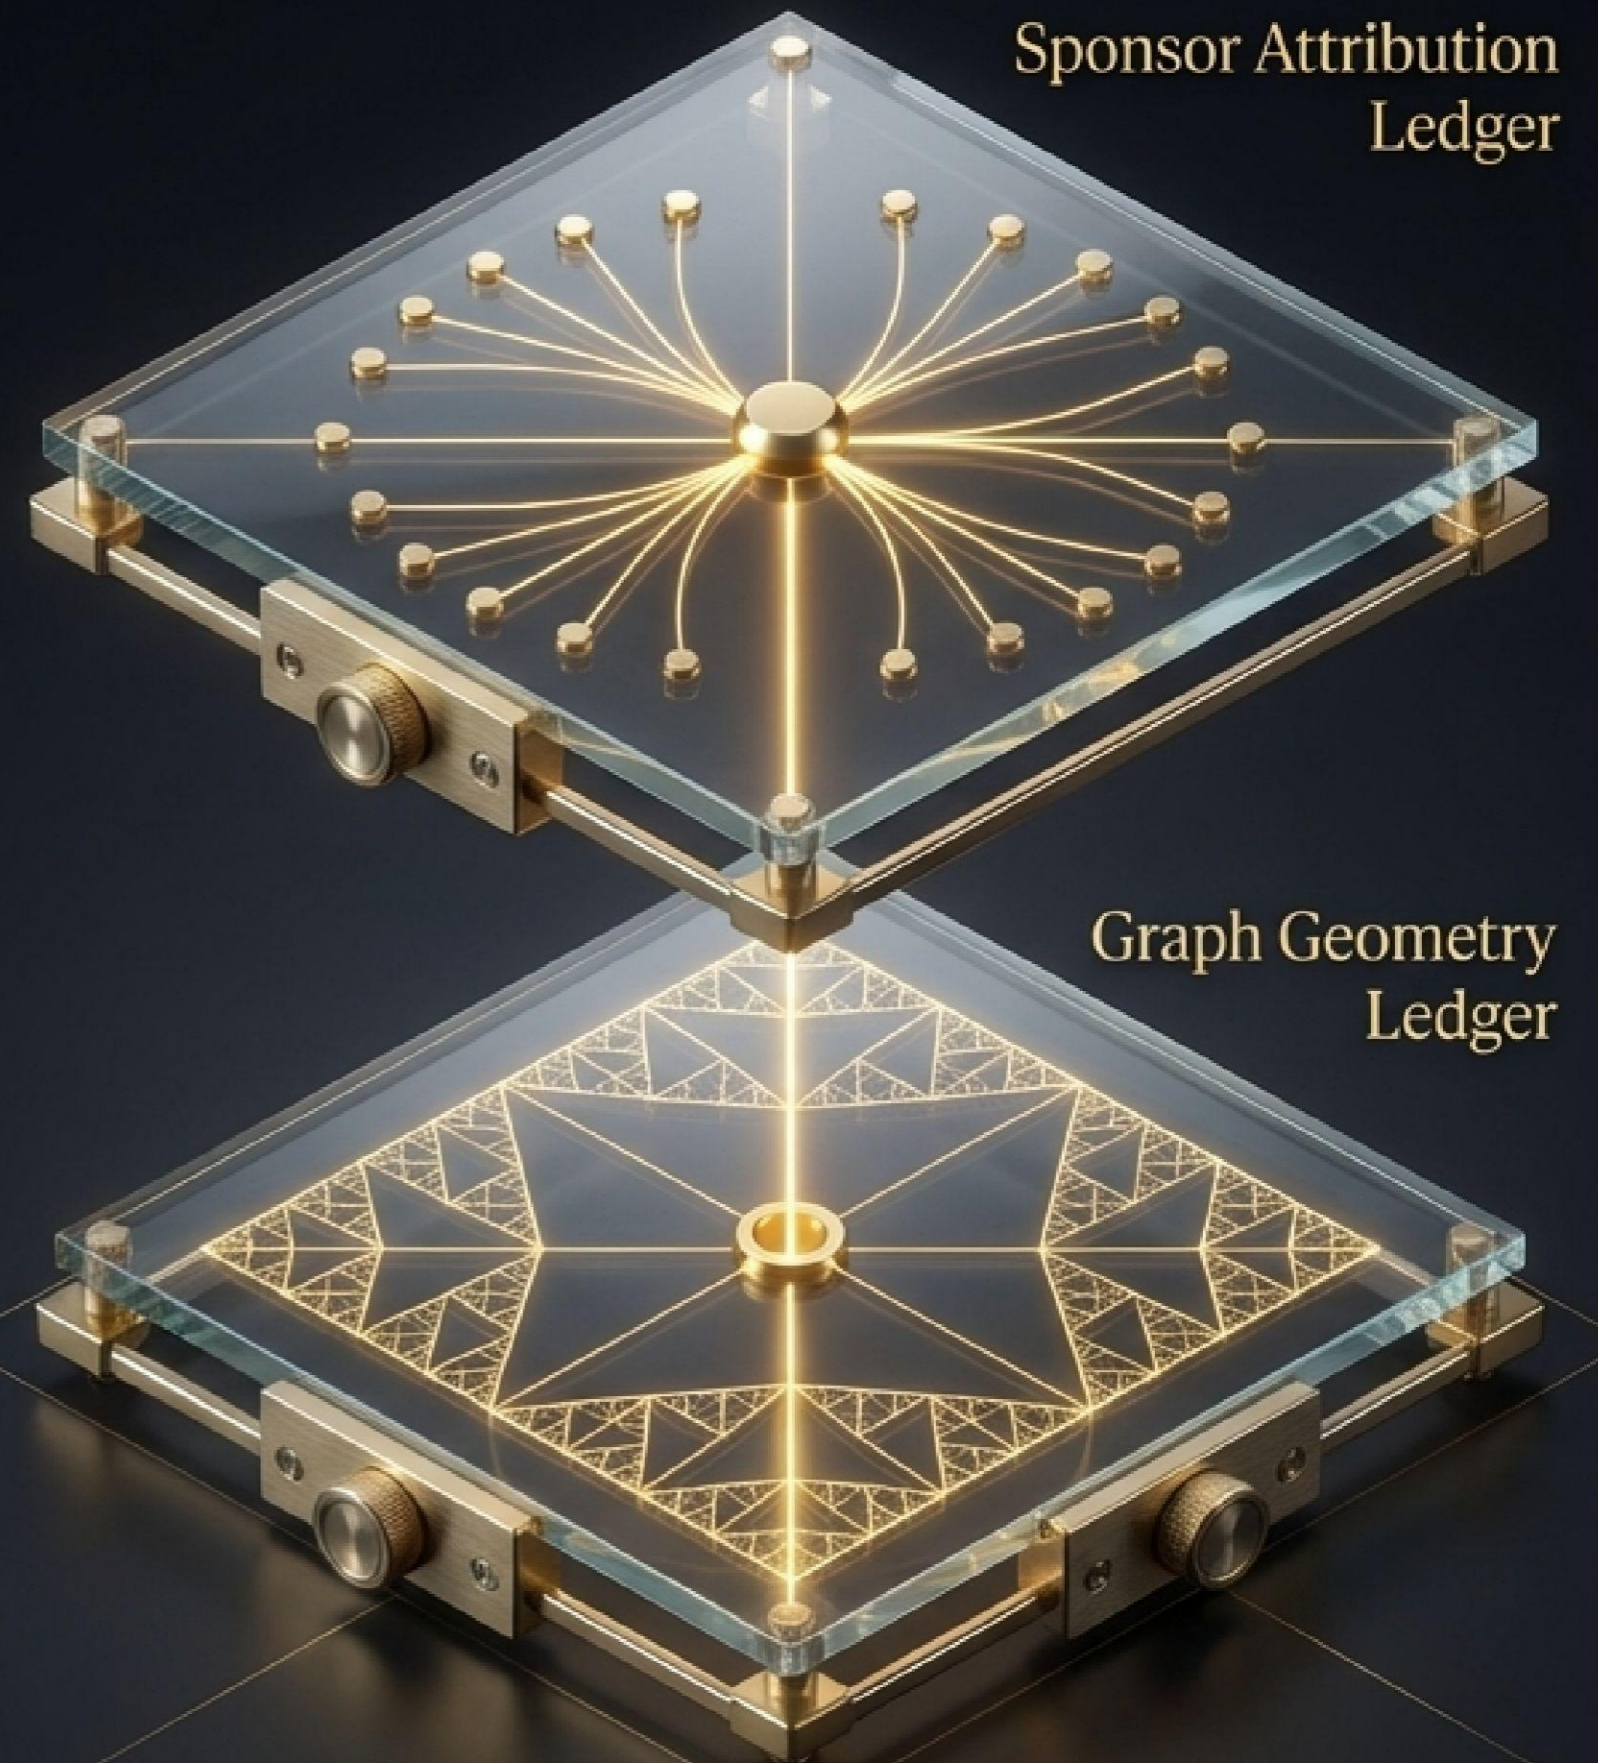

# The Dual-Ledger Advantage

Sponsorship secures your legacy.  
Graph placement optimises your structure.

Auronex runs on two distinct ledgers.

You determine where a new participant sits within the recursive Sierpinski graph to maximise structural density, while permanently retaining your exclusive Affinity entitlement from their production.

You never have to choose between helping the network and helping yourself.

# The Vertex Matrix

## Starter Vertex

\$50  
1 Point  
1x Weight  
Entry-level observation.

## Builder Vertex

\$500  
10 Points  
Commercial participation.

## Accelerator Vertex

\$2,500  
50 Points  
Serious network architecture.

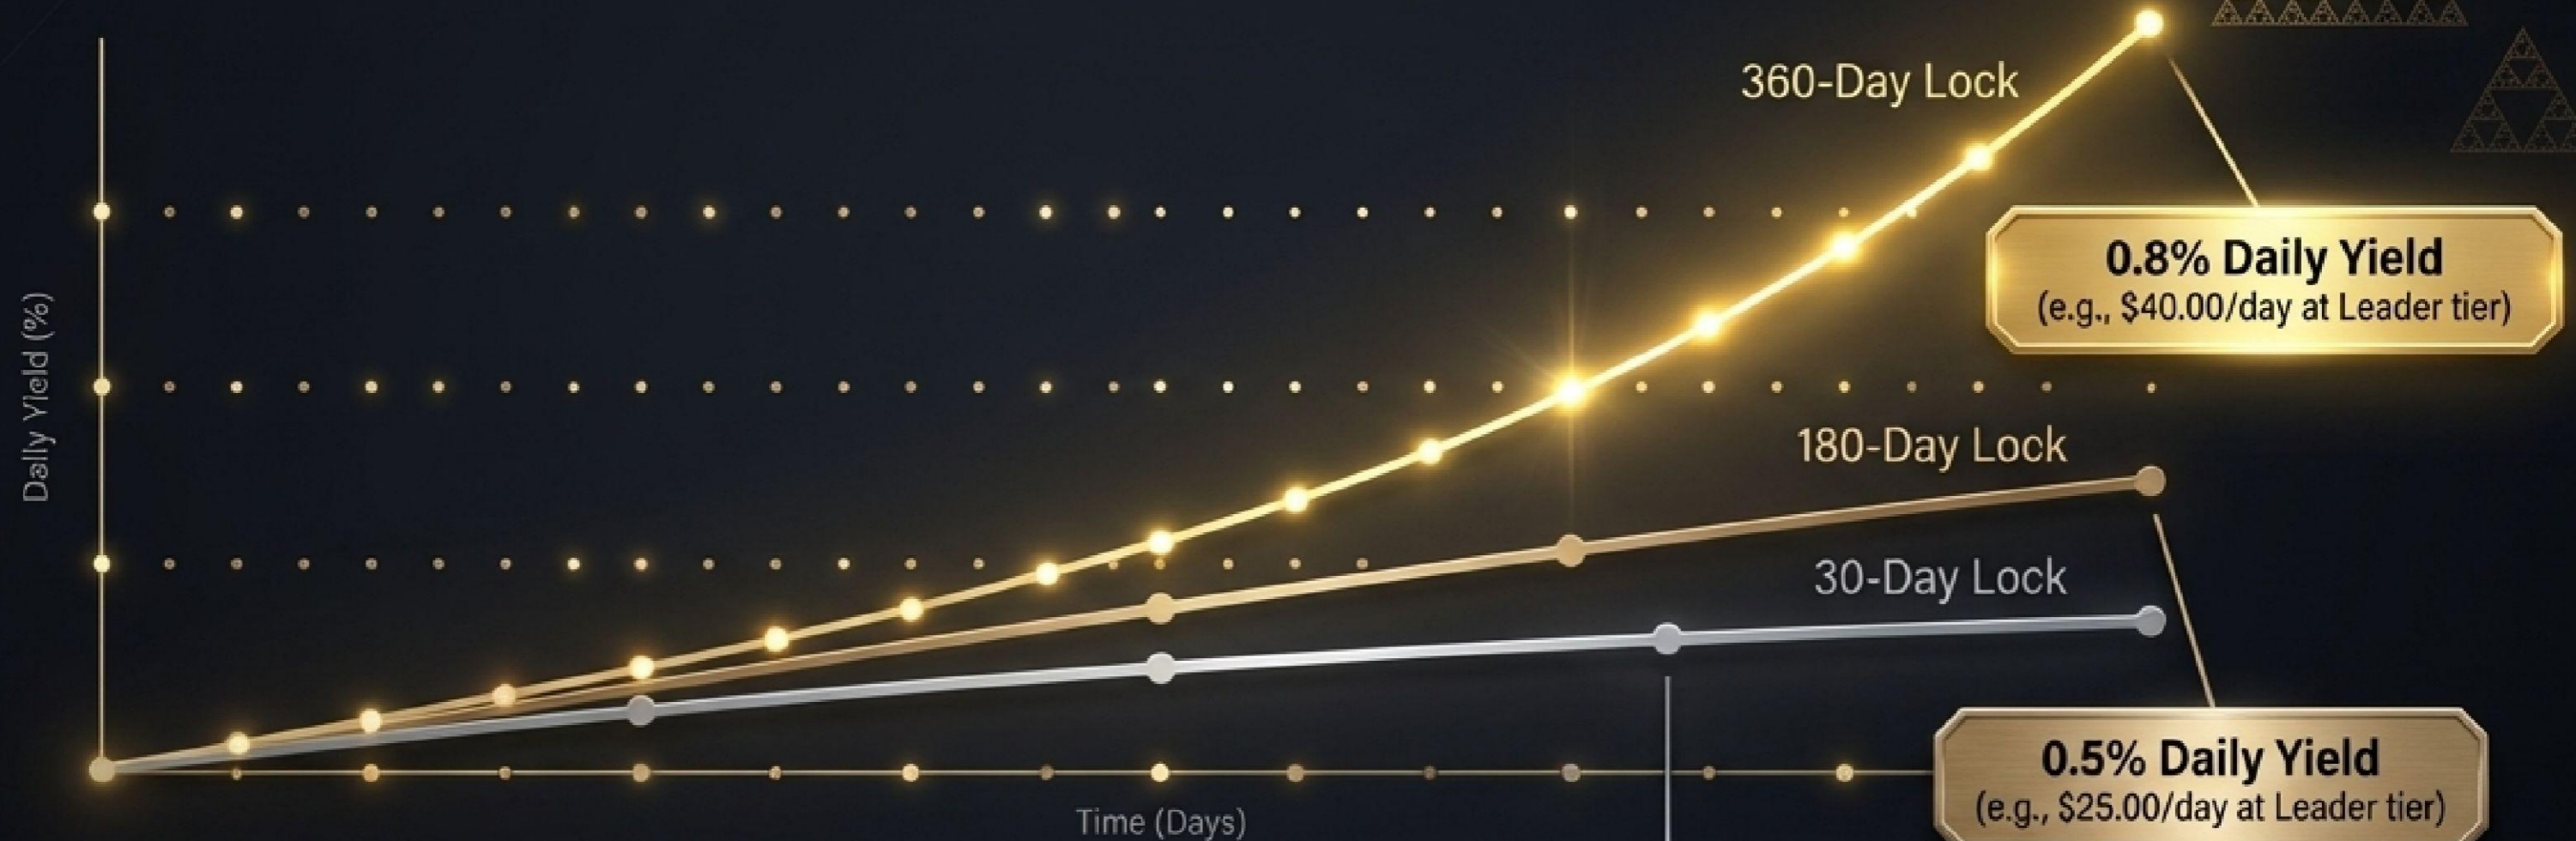

## Leader Vertex

\$5,000  
100 Points  
10x Weight  
The ultimate public tier for maximum throughput.

Exclusive Wallet Extension band available from \$5,001 to \$11,000 (scaling continuously up to 220 structural points).

# The Premium of Time

Commitment sets the daily mining rate.

The formula is simple:

$$\text{Daily Cap} = \text{Package Value} \times \text{Daily Rate}$$

Strategic commitment unlocks exponential daily mining capacity.

**0.3% Daily Yield**  
(e.g., \$15.00/day at Leader tier)

**0.5% Daily Yield**  
(e.g., \$25.00/day at Leader tier)

**0.8% Daily Yield**  
(e.g., \$40.00/day at Leader tier)

# The Four-Pillar Architecture

A flawlessly balanced daily reward budget.

**Pillar I: Structural Mining (30%)**  
Paid to active graph participants.

**Pillar II: Affinity Reward (30%)**  
The 21-level sponsor legacy chain.

**Pillar III: Structural Completion (25%)**  
The Sierpinski premium for balanced triangles.

**Pillar IV: Treasury Reserve (15%)**  
Institutional-grade downside protection.

# Pillar I — Structural Mining

Dominating the 30% active graph pool.

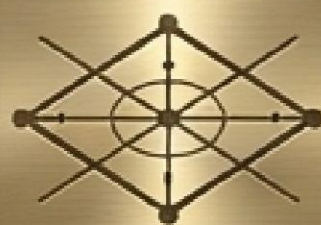

$$S = N_{occ} \times p_{base} \times w_{pkg} \times m_{active}$$

$N_{occ}$  : Total occupied nodes in your structure.

$w_{pkg}$  : Package weight multiplier (Scaling up to a massive 10x at the Leader tier).

$p_{base}$  : Base geometric value (2 points per node).

$m_{active}$  : Branch activity multiplier (1.00 for active, 1.25 for strongly productive, 0.00 for dark/inactive branches).

Your payout is pro-rata to your structural score, capped only by your package's maximum daily limit.

# Pillar II — Affinity Rewards

The 21-Level Legacy Chain.

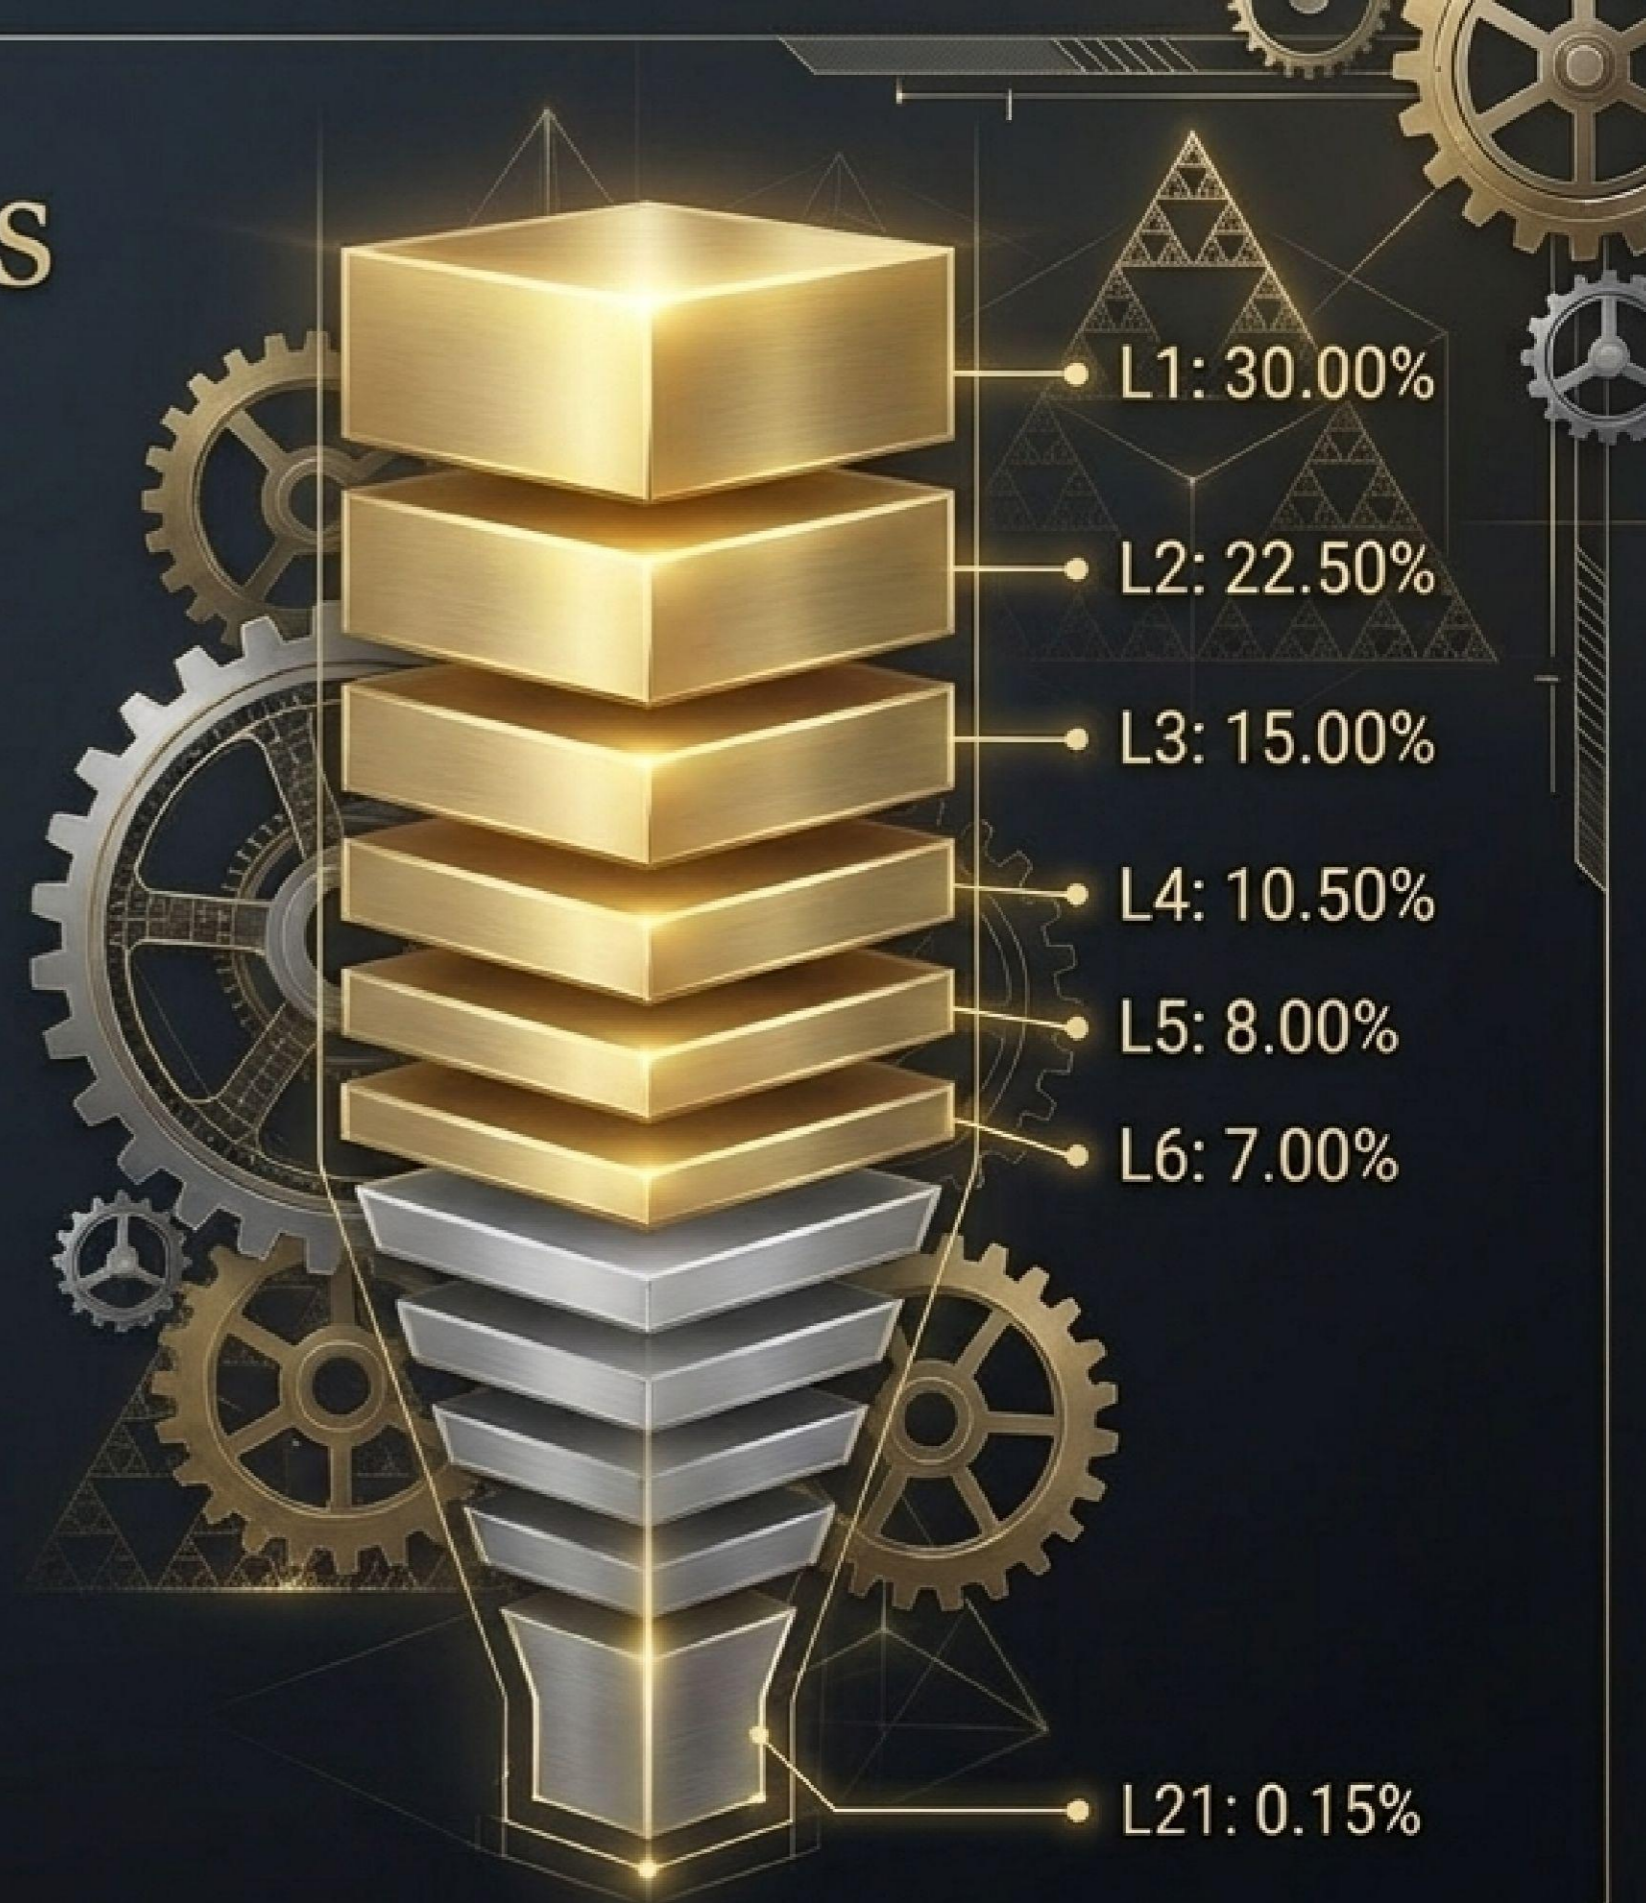

Replacing traditional one-off commissions with pure event-yield affinity. Every time a sponsored wallet produces yield, a share flows upward.

The first 6 levels capture the vast majority of wealth:

▶ L1: 30.00%	▶ L4: 10.50%
▶ L2: 22.50%	▶ L5: 8.00%
▶ L3: 15.00%	▶ L6: 7.00%

$$\text{Payout} = \text{Event Yield} \times \text{Level Rate}$$

Tapers smoothly down to Level 21.

# The Depth Unlocking Waterfall

Five sponsors. Unbounded depth.

1 Direct Sponsor = Paid on Level 1 only.

2 Direct Sponsors = Unlocks Levels 1-5.

3 Direct Sponsors = Unlocks Levels 1-10.

4 Direct Sponsors = Unlocks Levels 1-15.

5+ Direct Sponsors = The Ultimate Unlock: Levels 1-21.

**Strategic Imperative:** Acquiring 5 direct sponsors is the foundational requirement for elite network builders to capture total systemic yield.

# Pillar III — The Sierpinski Masterpiece

Exponential rewards for structural harmony (The 25% Pool).

1/3 Occupied

Visible, establishing roots  
(0.0x multiplier).

2/3 Formed

Structure begins earning  
(1.0x multiplier).

3/3 Completed

Masterpiece achieved.  
Triggers the 1.5x Premium.

**The Math:**  $C = N_{\Delta} \times 30 \times m_{\text{state}}$

A completed triangle scores a massive 45 points ( $1 \times 30 \times 1.5$ ).

Auronex uniquely rewards dense, perfectly balanced geometry over shallow, inactive branches.

# Pillar IV — The Treasury Reserve

Institutional-grade economic bedrock.

## **15% Daily Allocation:**

Systematically retained from the global reward budget.

## **Ceiling Support:**

Funds the gross affinity ceiling (the 50% bonus band).

## **Downside Protection:**

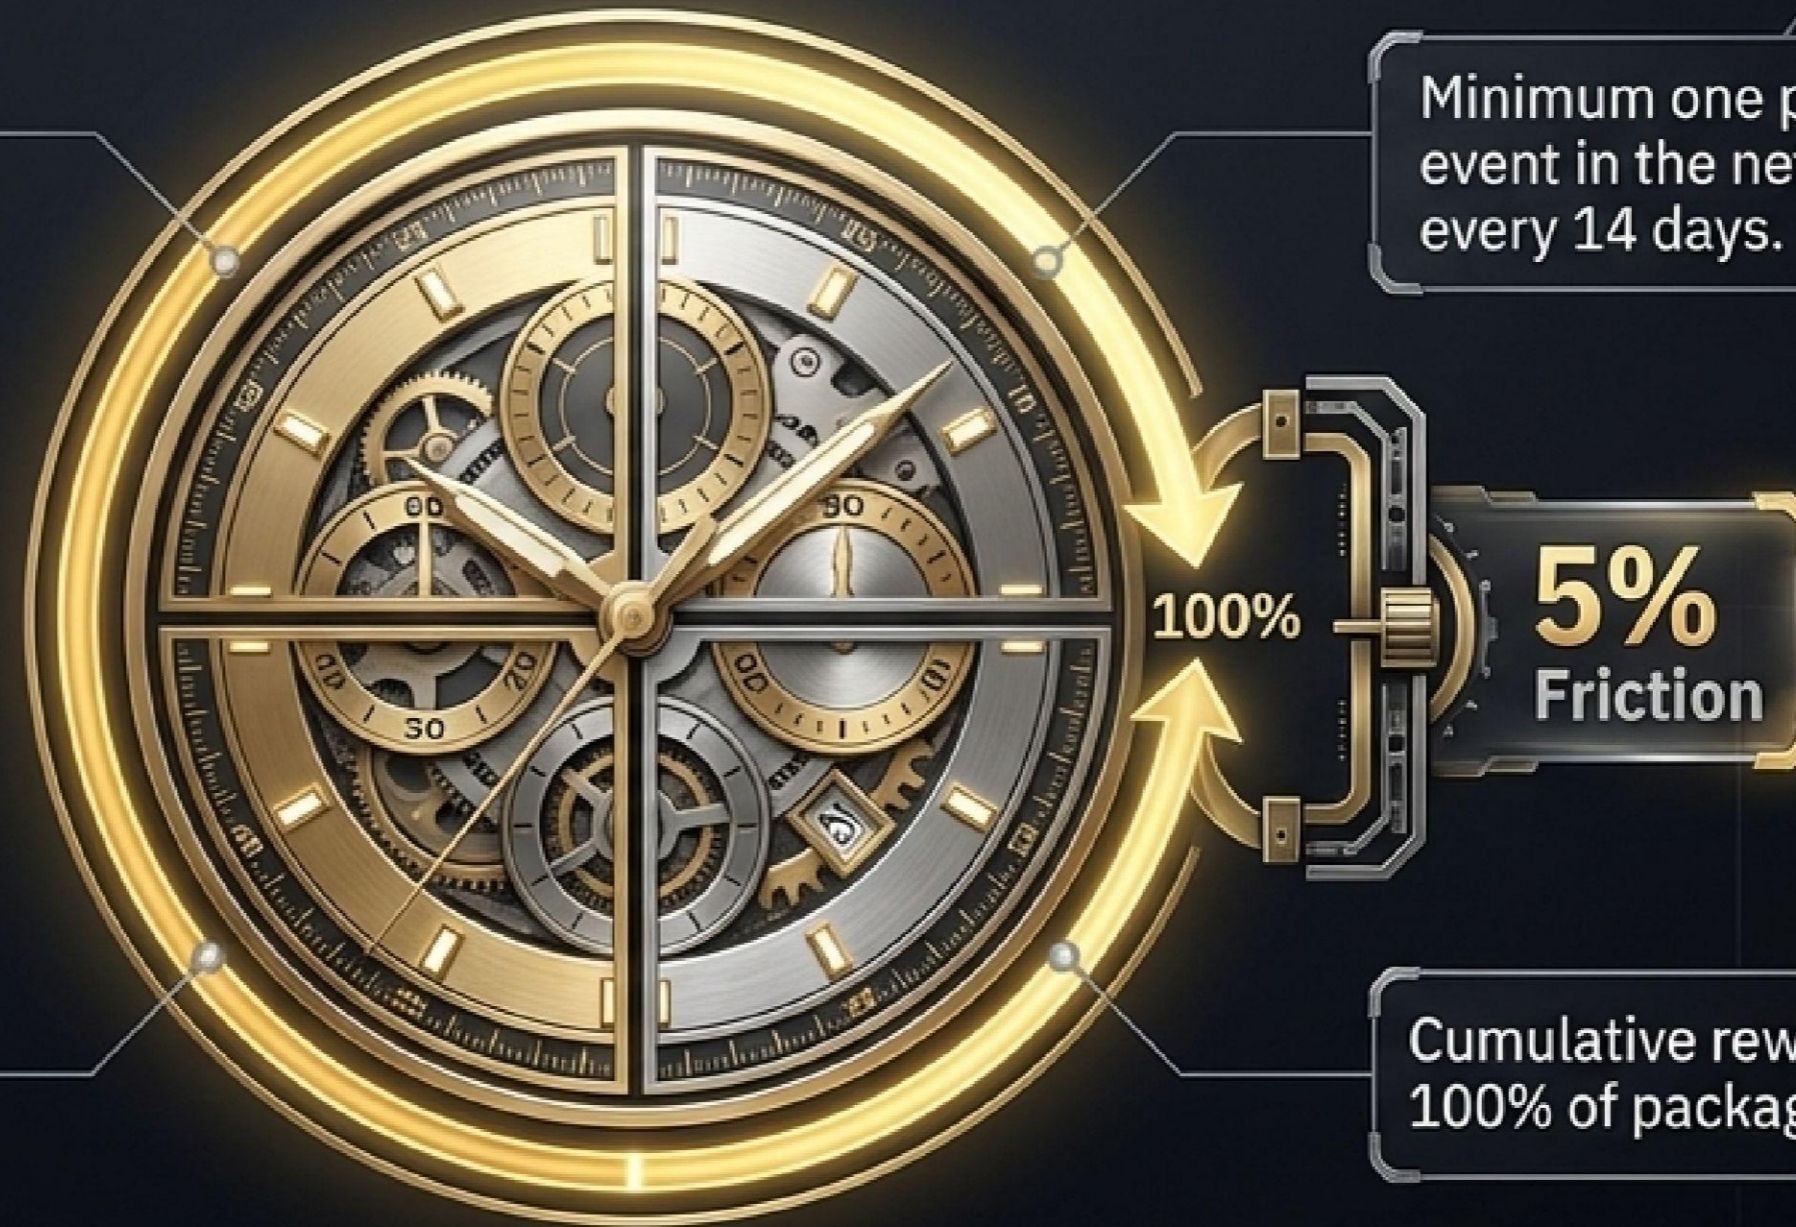

Acts as an unyielding economic shock absorber.

**Elite architecture** requires an **unshakable foundation**.  
The Treasury ensures perpetual network longevity.

# The Earning Cycle Engine

Valid mark-to-market package tier.

Minimum one productive event in the network every 14 days.

Daily mining click completed (or Active Agent).

Cumulative rewards below 100% of package value.

**The Cycle Reset:** Upon reaching 100% yield, the cycle halts. A nominal 5% restake friction (in XAUM or ANX) instantly resets the reward counter to zero without touching principal. Continuous capital velocity ensures a permanently healthy network.

# A Day in the Life of a Leader

The mathematics of perfect compounding.

**\$5,000** Leader Vertex | 360-Day Lock (0.8%)  
**= \$40.00 Daily Cap.**

TELEMETRY

With a massive 10x structural weight, the Leader dominates the Mining Pool.

TELEMETRY

By securing 5+ direct sponsors, the entire 21-level Affinity waterfall is captured.

**The Leader**

TELEMETRY

By meticulously completing 3/3 triangles, the 1.5x Sierpinski premium multiplies the Completion Pool share.

**Result:**  
Maximum daily yield extraction across all systemic layers.

# The Perfect Ecosystem

When individual ambition aligns with geometric perfection, the entire network thrives. The Auronex dual-ledger architecture ensures that every restake, every completed triangle, and every new sponsor fuels a sovereign, frictionless financial organism designed for perpetual growth.

# Take Your Place at the Vertex

The architecture is flawless. The graph is waiting.
